Subject: Reference Letter – Dávid Horov

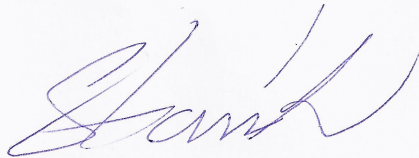

To Whom It May Concern

In the era of the internet, it is necessary to gain new clients through the website, even in an area such as finance. That's why I hired David to help me create to new interesting website which attracts new potential clients and helps me to increase sales.

During the development of the website David provided many suggestions for improvements what I wanted at the beginning. He improved it in terms of design and functionality, what I really appreciate. Communication was at high level, he replied expressly trough mail or phone and was willing to meet in person if necessary. His work was always done on time and in high quality beyond my expectations.

I highly recommend David for this job, because he is doing great job and he always find the way how to make you satisfied.

Sincerely,

Ing. Denis Staník
